“20-10 min/18 slides rule”.

Using the substantive experience of our meeting at the 3rd International seminar on Biocosmology in Witten, we highly recommend contributors to realize the “20-10 min/18 slides rule”, i.e., that the number of slides is limited to the number of 18, and that the time of speaking is not longer than 20 minutes, while 10 minutes is set aside for discussion. This “rule” really creates fruitful conditions for communication and collaboration during the meeting.
